Not more than two participants from one college  
Limited seats- First come, First served basis  
All participants will receive an E-Certificate

## CONCEPT NOTE

The National Education Policy 2020 (NEP 2020) announced by the Ministry of Education ( MoE) of India represents a paradigm shift in the way education is conceived, viewing it as a way to give students skills appropriate for the twenty-first century rather than just making them employable. It aims to close the gap between the state of learning outcomes now and what is required. In addition to reforms in administrative and regulatory systems, it calls for a thorough rethinking and restructuring of academic systems. The policy has the potential to harmonise the objectives of quality with affordability, academic degrees with job readiness, and national ambitions with individual gains when implemented with the participation involving all stakeholders including institutional leadership, faculty, administrators, and students.

### Objectives

- To comprehend NEP 2020's focus areas
- To investigate the many methods for navigating the complexities and difficulties of NEP 2020
- To understand multiple entry and admission path for multidisciplinary four year degree programme in line with NEP 2020
- To discuss credit structures and outcome-based curriculum development
- To understand examination and assessment process and multiple exit path.
- To elucidate on Ph.D. programme and promotion of research and innovation culture.
- To determine the methods for creating curriculum under NEP 2020
- To discuss various course and credit structure options.
